

Description

Blood is a liquid connective tissue formed by suspended cells, the plasma is the fundamental substance. Blood intervenes in transport functions (oxygen, nutrients), haemostasis and body defense.

The plasma is a liquid made up of 91 % of water and of variety of solutes:

- transport proteins (albumin, transferrin),
- defense proteins (immunoglobulins),
- coagulation factors,
- inflammation factors,
- enzymes, hormones, mineral constituents.

Serum corresponds to blood devoid of its cells and coagulation proteins. It is obtained after blood coagulation and centrifugation.

The products which we propose are intended for a research use or for control for the diagnostic tests.

All our products are collected aseptically and obtained from healthy animals.

Plasma

Cat.	Description	Qty
Normal mouse plasma		
RB02100	EDTA Liquid	1 mL
RB02101	EDTA Lyophilized	1 mL
RB02110	Sodium Citrate Liquid	1 mL
RB02111	Sodium Citrate Lyophilized	1 mL
RB02130	Alsever Liquid	1 mL
RB02131	Alsever Lyophilized	1 mL
Normal rabbit plasma		
RB02200	EDTA Liquid	10 mL
RB02201	EDTA Lyophilized	1 mL
RB02202	EDTA Liquid Potassic	10 mL
RB02203	Li-Heparinate	10 mL
RB02210	Sodium Citrate Liquid	10 mL
RB02211	Sodium Citrate Lyophilized	1 mL
RB02230	Alsever Liquid	10 mL
RB02231	Alsever Lyophilized	1 mL
Normal goat Plasma		
RB02600	EDTA Liquid	10 mL
RB02601	EDTA Lyophilized	1 mL
RB02610	Sodium Citrate Liquid	10 mL
RB02611	Sodium Citrate Lyophilized	1 mL
RB02630	Alsever Liquid	10 mL
RB02631	Alsever Lyophilized	1 mL

Blood

Cat.	Description	Qty
Normal mouse blood		
RB01100	EDTA	10 mL
RB01110	Sodium Citrate	10 mL
RB01130	Alsever	10 mL
Normal chicken blood		
RB01300	EDTA	10 mL
RB01310	Sodium Citrate	10 mL
RB01330	Alsever	10 mL
RB01331	Alsever	5 mL
Normal goat blood		
RB01600	EDTA	50 mL
RB01610	Sodium Citrate	50 mL
RB01630	Alsever	50 mL
Normal rabbit blood		
RB01200	EDTA	50 mL
RB01210	Sodium Citrate	50 mL
RB01230	Alsever	50 mL

Sera

Cat.	Description	Qty
RB03100	Normal mouse sera liquid	1 mL
RB03110	Normal mouse sera lyophilized	1 mL
RB03200	Normal rabbit sera liquid	5 mL
RB03205	Normal rabbit sera liquid	1 L
RB03210	Normal rabbit sera lyophilized	1 mL
RB03600	Normal goat sera liquid	10 mL
RB03610	Normal goat sera lyophilized	1 mL

Immunoglobulins

Cat.	Description	Qty
RB04100	Mouse IgG, control Immunoglobulin liquid	2 mg
RB04110	Mouse IgG, control Immunoglobulin lyophilized	1 mg
RB04200	Rabbit IgG, control Immunoglobulin liquid	5 mg
RB04210	Rabbit IgG, control Immunoglobulin lyophilized	2mg
RB04300	Chicken IgY, control Immunoglobulin liquid	5 mg
RB04310	Chicken IgY, control Immunoglobulin lyophilized	2 mg
RB04600	Goat IgG, control Immunoglobulin liquid	5 mg
RB04610	Goat IgG, control Immunoglobulin lyophilized	3 mg

- Blood is freshly collected for each customer order and shipped within 48 hours. It can be stored at 2-8°C until 5 days.
- Blood collected into alsever's solution is available for complement fixation and haemagglutination assays.
- Plasma, sera and immunoglobulins are stable 18 months.
- Freeze forms are kept at -20°C and freeze dried forms at 2-8°C.
- ❖ *Freeze-drying forms use :*
 - Add the appropriate volume of water (indicated on the flask) to the product.
 - Mix and wait for few minutes.
